Profile

Passionate fullstack developer with 5+ years of experience working collaboratively in teams from my past employers.

I consider myself as a fast learner, hard worker and always trying to be polite to talk with someone.

My next goals are: improve my communication, learn and know more about several skills and became an excellent IT architect.

Employment History

Fullstack Developer, Evox/Beesby

Feb 2019 — Present São Paulo

I participate in the main projects of the company assisting in the development.

I work especially with .NET / Node and VueJS, also Microsoft Azure (devops, azure functions, API gateway etc.), queues and topics, mongo, sql server and several others.

. Creation and maintenance a few platforms, the largest one an e-commerce of the 3 biggest companies in the construction industry

. Implementation of best practices for front-end and back as well

. Participation in the sprint definitions and presentation to the customer

. I suggested and implemented the log tracking feature, first using mongo and the using Splunk

. Developed several critical components, such as the cart for example

. Working 80% remote

Technologies Used: .NET, VueJS, Node, Redis, Stylus, Figma, Jira/Monday, Azure DevOps, Sql Server / Mongo as NOSQL, Jest, XUnit, Splunk, Git.

Fullstack Developer, Pine Bank

Feb 2016 — Jan 2019 São Paulo

Was a great experience working at Pine Bank, there i used .NET, VueJS / React.js, SQL Server.

Here i participated in the most difficult project to manage and learned to develop several related skills.

. Creation and maintenance of several banking systems with different integrations, especially with central bank

. Participation in the development one system that replaces excel spreadsheets

. Requirements gathering directly with the user

Technologies Used: VueJS, React.js, CSS, HTML, Figma, TFS/Azure DevOps, Sql Server, XUnit, Git, Splunk, .NET.
